

Q2 Board Meeting

Date _____

Time _____

Attendees _____

Apologies _____

Topics

■ Financial Results & Runway	30 min
■ People & Hiring	20 min
■ Product Roadmap	20 min
■ Strategic Growth	15 min
■ Governance & AOB	5 min

Total allocated	90 min
-----------------	--------

Q1 revenue performance: 8% ahead of plan

Talking points

- Revenue came in 8% ahead of forecast
- Strong execution across key customer accounts
- Growth trajectory supports Series B deferral decision

Questions

- ? What were the key drivers of the revenue outperformance?
- ? How does the Q1 performance compare to guidance for Q2 and H2?

NOTES

ACTIONS

☐		
☐		
☐		
☐		
☐		

EBITDA margin compression: 2.5 points (rebrand costs and accelerated R&D hiring)

Talking points

- EBITDA margin compressed 2.5 points due to two one-off items: rebrand costs and accelerated R&D hiring
- Both are strategic investments with clear forward justification
- Rebrand impact is non-recurring; R&D hiring rate moderates in H2

Questions

- ? Of the 2.5-point compression, how much is attributable to rebrand vs. R&D headcount acceleration?
- ? What is the expected margin recovery profile as rebrand costs complete and R&D hiring stabilizes?

NOTES

☐		

CFO bridge walk-through of financial results

Talking points

- Detailed bridge from Q1 guidance to actual results
- Revenue drivers and margin component analysis
- Cash flow impact from SAFE funding round

Questions

- ? Are there any working capital or cash conversion cycle items the board should monitor?
- ? What is the forward margin assumption underpinning the H2 plan?

NOTES

ACTIONS

☐		
☐		
☐		
☐		
☐		

Cash runway extension: 14 months → 19 months (SAFE round impact)

Talking points

- SAFE round closed in March, extending cash runway from 14 to 19 months
- Significant de-risking of the funding timeline
- Provides runway to demonstrate metrics for Series B

Questions

- ? What is the burn rate embedded in the 19-month runway estimate?
- ? Should we model any variance scenarios (upside/downside burn rates)?

NOTES

ACTIONS

☐		
☐		
☐		
☐		
☐		

Series B deferral decision: defer two quarters

Talking points

- Series B deferred from Q3 to Q1 2027
- Allows time to demonstrate product-market fit metrics and revenue momentum
- Reduces near-term fundraising pressure

Questions

- ? What are the key metrics we need to hit to be Series B-ready in Q1 2027?
- ? Are there any downside scenarios where we'd need to fundraise sooner?

NOTES

ACTIONS

☐		
☐		
☐		
☐		
☐		

Board acknowledgement of new runway and deferral

Talking points

- Board to formally acknowledge the new 19-month runway
- Approval of the two-quarter Series B deferral
- Confirm strategy remains capital-efficient growth

Questions

- ? Is there board alignment on the Series B timing and the metrics framework?
- ? Should we adjust headcount or spending plans given the extended runway?

NOTES

ACTIONS

☐		
☐		
☐		
☐		
☐		

Engineering hiring progress: 12 of 15 planned hires landed

Talking points

- Strong engineering hiring execution: 12 of 15 on-plan hires completed
- Backlog cleared and team scaling on schedule
- Hiring velocity supports the accelerated R&D roadmap

Questions

- ? Of the 3 open engineering requisitions, what is the timeline to fill them?
- ? Are we seeing any wage inflation or talent scarcity in the engineering market?

NOTES

ACTIONS

☐		
☐		
☐		
☐		
☐		

GTM hiring status: 0 of 3 landed (head of GTM not yet onboarded)

Talking points

- Head of GTM hire in progress but not yet onboarded
- The 3 GTM team member hires are dependent on the head of GTM being in role
- This creates a decision point on timing and approach

Questions

- ? When is the head of GTM expected to start?
- ? What does the GTM function look like without a lead in place?

NOTES

ACTIONS

☐		
☐		
☐		
☐		
☐		

Board decision item: delay GTM hires until head of GTM onboards vs. backfill via contractors

Talking points

- Two options: (1) delay GTM hires until head of GTM starts and can build the team, or (2) backfill via contractors to maintain momentum
- Delaying reduces payroll and onboarding overhead but slows GTM function buildout
- Contractor path keeps GTM moving but may require team restructuring once the GTM head arrives
- This is a strategic decision requiring board steering, not just management recommendation

Questions

- ? What is the business impact of delaying GTM hires vs. the cost of contractor backfill?
- ? What is the GTM head's timeline to recruiting and onboarding their own team?
- ? Does the board have a risk appetite preference: move fast with contractors or build organically with structure?

NOTES

ACTIONS

☐		
☐		
☐		
☐		
☐		

Staffing plan update based on decision

Talking points

- Once the GTM decision is made, staffing plan and budget forecast will be updated
- This decision cascades into H2 cash flow and hiring plan

Questions

- ? Should we model both scenarios in the financial forecast for H2?

NOTES

ACTIONS

☐		
☐		
☐		
☐		
☐		

Design partner feedback: workflow automation ranks higher than analytics dashboard

Talking points

- Customer feedback from design partner programme strongly favours workflow automation over analytics dashboard
- Workflow automation addresses a higher-priority customer pain point
- Analytics dashboard remains valuable but is lower priority in H2 window

Questions

- ? How definitive is the design partner feedback? What is the sample size and confidence level?
- ? Is there a segment of users who would prefer the analytics dashboard first?

NOTES

ACTIONS

☐		
☐		
☐		
☐		
☐		

H2 roadmap reprioritisation: swap workflow automation and analytics dashboard

Talking points

- Proposal to swap the H2 roadmap: workflow automation moves to primary focus, analytics dashboard moves to H2 secondary or Q1 2027
- Aligns product strategy with strongest customer signal
- Requires engineering effort estimate confirmation for workflow automation in H2 timeline

Questions

- ? What is the engineering effort to deliver workflow automation by end of H2?
- ? Are there any customer commitments or contracts tied to the analytics dashboard timeline?

NOTES

ACTIONS

☐		
☐		
☐		
☐		
☐		

CPO approval request for roadmap shift

Talking points

- CPO seeking board approval for the roadmap swap
- This is a customer-driven reprioritisation with clear justification
- Approval enables PMO and engineering to execute confidently

Questions

? Is there board consensus that workflow automation should take priority in H2?

NOTES

ACTIONS

☐		
☐		
☐		
☐		
☐		

EU market expansion decision: H2 (faster, stretches team) vs. H1 2027 (slower, hire country lead)

Talking points

- Strategic option 1: expand into EU in H2 2026 (faster go-to-market, but stretches current team across geographies)
- Strategic option 2: wait until H1 2027, hire a country lead first (slower, but cleaner org structure and local presence)
- This is fundamentally a risk appetite and market timing question
- EU market is strategic for growth but requires either team stretch or hiring investment

Questions

? What is our competitive pressure in the EU market? Is there a first-mover advantage we should chase?

? If we wait until H1 2027, how much market opportunity do we risk losing?

? What is the team stretch scenario in H2? Which functions would be stretched, and what are the risks?

NOTES

ACTIONS

☐		
☐		
☐		
☐		
☐		

Risk appetite question for the board

Talking points

- This decision requires board-level risk appetite: move fast and accept operational complexity, or move deliberately and invest in structure
- Each path has clear tradeoffs
- Board input is essential to establish the strategic direction

Questions

? What is the board's risk appetite for geographic expansion timing?

? Are there board concerns about team burnout or execution risk if we expand in H2?

NOTES

ACTIONS

☐		
☐		
☐		
☐		
☐		

Expansion timing and staffing implications

Talking points

- H2 expansion requires immediate team mobilization (country lead, regional partnerships, compliance)
- H1 2027 expansion allows parallel hiring of a dedicated country lead and team
- Staffing implications flow into cash flow and burn rate projections

Questions

- ? What would a dedicated EU country lead and initial team look like in terms of headcount and cost?
- ? How does this staffing impact the cash runway forecast?

NOTES

ACTIONS

☐		
☐		
☐		
☐		
☐		

Approval of minutes from last meeting

Talking points

- Minutes from the previous quarterly board meeting are available for review
- Any corrections or amendments should be noted

Questions

? Are there any corrections to the previous meeting minutes?

NOTES

ACTIONS

Conflicts of interest declaration

Talking points

- Standard disclosure of any conflicts of interest related to today's agenda items

Questions

? Does anyone have a conflict of interest to declare for any of today's agenda items?

NOTES

ACTIONS

Any other business

Talking points

- Open floor for any additional topics not covered in the structured agenda

Questions

? Are there any other topics the board would like to discuss?

NOTES

ACTIONS
